Cosmetics

COSMETIC PROCEDURES

What we offer:

Holistic facial cosmetic consultations
IV nutrient therapy
Skin boosters
Chemical face peels - medical grade
Hyperhydrosis management - excessive sweating
Dermafacials
RegenU LED Therapy
LHA LALA Chemical Peel
Skin Needling

Our experienced team of doctors and nurses will complete a thorough consultation to create a treatment plan just for you.

DERMAFACIALS PRICE LIST

Dermafacials involve a very deep clean and hydration of your skin that can clean pores by removing excess debris and allows for the serums to work more effectively.

Dermafacial 1 hour	\$199
--------------------	-------

Add ons:

Derma Neck 15 mins	\$59
--------------------	------

Derma Decolletage 15 mins	\$59
---------------------------	------

Derma Hands 15 mins	\$59
---------------------	------

Our Hydrate and Heal package consists of a Dermafacial full facial plus RegenU LED, for \$249.

Pre-book 10x package sessions to receive a discounted price of \$233 per session.

Collagen peptide mask add on: \$49 per session.

Please contact us directly to check availability and secure your booking

LED PRICE LIST

LED therapy involves the use of specific wavelengths of light to target various skin concerns and promote overall skin health.

LED Therapy Session 30 mins \$59

Add ons:

Add on an LED Therapy Session 30 mins
to your facial or skin needling \$29

Please contact us directly to check
availability and secure your booking.

OTHER SKIN TREATMENTS

Skin Boosters (1hr): from \$500

Skin Needling (1.5hrs): \$299

\$169 for 2 (\$338)

\$162 for 4 (\$648)

Boost results with Growth Factor Complex: \$90

*Recommended for best healing - Tissue Repair
Pro (take home aftercare): \$38*

LHA LALA Chemical Peel (1.5 hrs): \$280*

**special introductory price*

HOW DOES SKIN NEEDLING WORK?

Our skilled clinicians delicately glide medical-grade tiny needles over your skin during Skin Needling, stimulating a natural wound-healing response.

This innovative process kickstarts your body's regeneration, promoting the production of collagen and elastin, resulting in visibly smoother, firmer, and more youthful-looking skin.

The procedure creates micro channels that facilitate the direct infusion of potent active ingredients.

FREQUENCY ASKED QUESTIONS ON SKIN NEEDLING:

Suitable concerns for treatment:

- Reduce signs of aging
- Improve skin elasticity
- Soften wrinkles and fine lines
- Improve tone and texture
- Reduce acne and surgical scarring
- Reduce pore size
- Reduce pigmentation
- Improve redness and rosacea
- Reduce and soften stretch marks

WHAT IS MEDICAL SKIN NEEDLING?

Also known as Collagen Induction Therapy, oscillating micro-needles gently glide over the skin and create tiny channels down into the deeper layers of the dermis.

The natural wound-healing response of the skin, breaks down old damaged tissue and stimulates collagen and elastin production.

The key differences between medical and non-medical needling include the device, the needles, the depth of penetration and expertise of a medically trained dermal therapist.

Always check that your device and needles are TGA approved and the penetration depth and speed will achieve the results you desire.

HOW DOES SKIN NEEDLING FEEL?

We recommend the use of a topical numbing agent.

The treatment is generally painless other than a prickling sensation although areas like the forehead can be a little more sensitive.

CONTRAINDICATIONS FOR SKIN NEEDLING

- Pregnancy
- Some medications (including oral Vitamin A, warfarin, roaccutane, antibiotics, blood-thinners and long-term aspirin use)
- Active cold sores in the treatment area

BEFORE YOUR TREATMENT

The use of a cosmeceutical skin care program will reduce downtime and produce a better result.

Please call the clinic to discuss any treatments that you have booked elsewhere, prior to your treatment, to ensure it will be safe to proceed. Invasive treatments including clinical peels, ipl and laser resurfacing should not be performed 2-4 weeks prior to your treatment.

AFTERCARE

For the first 48 hours, we recommend to

- Avoid makeup, including self-tan, as this may impair the healing process and contain bacteria that may cause an infection
- Avoid activities that make you sweat or hot, it will create further unwanted heat in the skin can allow bacteria to penetrate. This includes the use of saunas, spas and swimming in chlorinated water.
- Avoid using anti-inflammatory medications, such as ibuprofen, as they interfere with the natural inflammatory process.
- Avoid all sun exposure, Your skin will be much more sensitive to the sun for several weeks after your treatment.
- Do use an active Hyaluronic product, we recommend Aspect Dr this will keep your skin hydrated and in an optimum state for collagen production.
- Discontinue the use of all other skin products or sunscreens for the first 48 hours.

3-5 Days Post Treatment we recommend,

- Avoid picking the skin and continue to apply Hyaluronic Serum.
- Re-introduce your normal skin care regime, including a gentle cleanser and moisturiser as directed by your therapist.
- Apply sunscreen daily and continue to avoid sun exposure which may lead to unwanted pigmentation and sun-damage.
- Skin care products containing active exfoliating ingredients such as Retinol, Alpha Hydroxy Acids, Beta Hydroxy Acids, Vitamin A should be introduced back slowly into your routine after Day 5.
- Chemical Peels, Cosmetic Tattooing, Cosmetic Injectables and IPL / Laser Treatments should be avoided for a minimum two – four weeks or as advised by your therapist.

SKIN NEEDLING DOWNTIME

The skin's natural reaction is inflammation and redness, however this is only for a short time and will fade to a pinky hue within a few hours after your treatment.

The skin will feel a little like sunburn and the pinky hue can remain for an average of 12 to 24 hours after your treatment.

Over the next three to five days, you may feel some dryness and flakiness through the skin healing process.

Once the process has been completed your skin will feel softer, firmer and look more radiant.

FREQUENCY

We generally recommend three to six treatments skin-needling treatments at four-week intervals.

Scar reduction is best treated with with six to ten treatments.

BOOST YOUR RESULTS

Skin needling always works best when combined with cosmeceutical home-care.

If you're serious about results we recommend adding the following treatments to your appointment to improve your outcomes.

- LED Light Therapy

LED LIGHT BLUE 415nm

- Anti-bacterial action
- Prevents Breakouts
- Balances oil production
- Improves skin clarity
- Improves Eczema, Psoriasis and Dermatitis

LED LIGHT RED 633nm

- Boost collagen and elastin
- Reduces fine lines and wrinkles
- Increases skin hydration
- Shrinks enlarged pores
- Evens skin tone

LED INFRARED 830nm

- Reduces pigmentation and age spots
- Scar reduction
- Calms redness and irritation
- Treats rosacea
- Ideal for the most sensitive skins

LHA LALA CHEMICAL PEEL

The LHA LALA peel was launched in 2020 in South Korea and is now offered in 500+ dermatology and skin clinics in Korea alone. Commonly known as the Glass Skin Facial, this treatment is becoming increasingly popular due to its no downtime, no discomfort and glass skin like results. We are always staying up-to-date with current industry trends and products, and at Kapurn Skin we are proud to introduce the LHA peel amongst our extensive selection of chemical peels and dermal therapies.

WHAT IS LIPOHYDROXY ACID?

LHA stands for lipohydroxy acid, which is a 4th generation acid to enter the aesthetics industry. LHA falls under the beta-hydroxy (BHA) acid category and is a salicylic acid derivative. It features anti-microbial, anti-inflammatory and anti-fungal properties.

LHA is considered to be comedolytic (an ingredient capable of preventing and treating comedones) and helps prevent blemishes from forming when oil becomes trapped in pores. It can directly target sebum-rich sebaceous glands, further preventing acne and blemishes.

This treatment helps reduce dead skin cell build, thus allowing more optimal penetration compared to some other skin products. In your LHA Facial with PCM, we perform the LHA Facial with our photo-biomodulating LED light – also known as Healite II – combined also with a custom hydrating mask suited to your skin type.

Compared to salicylic acid (another beta-hydroxy acid), LHA has a larger molecular size and a fatty acid structure, thereby enabling LHA to penetrate the skin at a slower rate when compared to salicylic acid. LHA is gentler and more well-tolerated, than some other hydroxy acids. LHA is a great alternative for those who cannot tolerate other chemical exfoliants or those wanting something with zero to minimal downtime.

WHAT ARE THE BENEFITS OF OUR LHA PEEL?

- Skin cell regeneration
- Reduce acne and congestion
- Cleans and improves appearance of pores
- Improves acne scarring and marks
- Hyperpigmentation and sun damage reduced
- Improve skin texture and tone
- Increases absorption of subsequent treatments and products
- Plumps skin and improve fine lines and wrinkles
- Glass skin-like results

WHAT ELSE IS IN THIS PEEL OTHER THAN LIPOHYDROXY ACID?

P-Sol™

Obtained from natural oils, such as olive and coconuts, P-Sol helps to reduce irritating side effects of chemical exfoliants and it optimises formula efficacy through a patented production technology. P-Sol helps to induce fibroblast activation, protects skin surface, and generates a barrier of proteins and lipids. It can also assist with collagen and fibrous tissue remodelling.

Lipids

Lipids are fatty compounds that support skin cell structure and integrity. They form part of the skin barrier that reduces sensitivity and irritation. When combined with comedolytic or exfoliating ingredients such as LHA, they help reduce irritancy and downtime.

WHAT TO EXPECT FROM THE TREATMENT?

Step 1: Micro bubble cleanse

A pH balanced peel is used to thoroughly cleanse the skin, removing impurities, dirt and makeup efficiently without stripping the skin.

Step 2: LHA Basic Peel

The first peel is applied using a unique brush method, increasing circulation and lymphatic flow at the same time. It is left on the skin for 5-10 minutes, before being removed with a wet, cold cloth.

Step 3: LHA Ultra Peel

The second peel is applied using an upwards motion and is double the strength of the basic peel. It is left on the skin for 5-10 minutes, before being removed with a wet, cold cloth.

Step 4: RegenU LED

Our RegenU LED light therapy is a stimulating light that increases cellular energy. It helps the skin function optimally and is not only soothing for the skin, but it relaxes the mind too! Some warmth is felt during the session of approximately 10 minutes. It feels like lying under the sun but without the harmful UV effects!

Step 5: Custom gel mask

A custom sheet mask is applied that is geared towards hydrating, nourishing and calming the skin. This last piece of the puzzle is as essential as every other step in this facial. We've now peeled, filled and exfoliated the skin – we now want to allow the skin to take in all that hydration to finish off the process.

LHA LALA PEEL FREQUENTLY ASKED QUESTIONS (FAQS)

How many LHA Peel sessions do I need?

3-6 sessions are recommended for optimal results, spaced with 1-2 week intervals between each session.

Can the LHA Peel be performed in combination with other treatments?

This facial can be done before any treatment at Pavilion Cosmetic Medicine (PCM). Yes, that includes our wrinkle reduction treatments!

What is cost of an LHA Peel and how do I book?

We have a special introductory offer at the moment, our LHA facial is \$280.

Does the LHA Peel hurt and will there be downtime?

There is absolutely no discomfort and very little to no downtime with this treatment. It can be done right before your special event. If you are a bride or groom, please book a session well in advance (a minimum of 4 weeks prior is advised), to ensure there are no unexpected adverse reactions. Following the initial session, the second treatment session can be performed 2-3 days prior to the big day!

IV VITAMIN *Drip Therapy*

IV therapy is one of the most exciting wellness treatments that replenishes your body with hydration.

CUSTOMISED *Drip*

We customise drips to your needs, from our wide selection of vitamins with standard 500ml Hartmann's hydration.

A \$100 non-refundable deposit payment is required at the time of booking.

CHOOSE YOUR *Goodies*

Vitamins & amino acids you can choose for your customised drip include the following:

- + VITAMIN C
- + B COMPLEX
(b1, b2, b3, b5)
- + MAGNESIUM
- + MAGNESIUM
- + GABA
- + TAURINE
- + SERINE

HEALITE II LED THERAPY

WHAT IS HEALITE II?

HEALITE II is a second-generation Light Emitting Diode (LED) phototherapy system that is now available in Australia and is TGA approved.

Low-Level Light Therapy (LLLT) with HEALITE II is a non-ablative skin surface treatment system that uses light delivered through light emitting diodes to deliver pure light in precise wavelengths for the treatment of acne, superficial skin lesions, relieving pain, promoting skin rejuvenation and others.

Developed by Dr Glen Calderhead, known as the guru of LED technology, HEALITE II harnesses the properties of light via Light Emitting Diode (LED) technology, properly delivered and concentrated, treating effectively without possibility of physical trauma or thermal damage.

According to Dr Calderhead, one of the key advantages of the HEALITE II is that it has such a wide range of clinical indications. It has been shown to speed up the healing of wounds caused by laser treatment or surgery, and can even reduce the pain, bruising and swelling experienced post-laser treatment. Treatment with the HEALITE II may also improve the appearance of fine lines and wrinkles, improve photo-aged skin and enhance skin tone and texture.

BENEFITS OF HEALITE II PROCEDURES

- Improves the appearance of skin pigmentation and wrinkles
- Quickens wound healing and scarring
- Treats acne
- Stimulates hair growth
- Improves circulation
- Relieves pain and stiffness in joints.

HEALITE II™ can be used as a standalone therapy or as an adjunctive therapy to a wide range of treatments, including aesthetic laser treatments, skin needling, deep chemical peels and pre and post plastic surgery. With two light settings, the wavelengths of light can penetrate the layers of the skin to help to improve its barrier function to retain key elements that help heal and generate new collagen after its production has slowed due to age or damage.

Treatments are noninvasive, pain free and relaxing, and best results are seen when a series of treatments are undertaken, within a 48–72-hour time period.

Some of the proven benefits of HEALITE II sessions include an increase in collagen and elastin production, a reduction in lines and wrinkles and better skin tone and texture. The result is smoother, youthful, more supple skin. HEALITE II is currently one of the most advanced LED-based systems available today.

Regardless of whether it's used as a standalone treatment or as part of a treatment plan, HEALITE II is capable of exceptional results. The high-quality LED lights deliver energy safely and evenly, which is how surrounding tissue remains protected.

At Kapurn Skin, we recommend HEALITE II treatments to patients who want to promote skin rejuvenation and healing or enhance treatment results.

A reduction in the appearance of poor skin tone, texture, pigmentation and acne is just the start. Treatments can also reduce pain, bruising and swelling following surgery, thread lifts or cosmetic injections. All skin types can benefit from HEALITE II sessions, without the need for downtime or the risk of complications.

HEALITE II LED Light Therapy not only helps rejuvenate your skin, but it has a lot of healing benefits as well. It can be used to help improve inflammatory skin conditions such as dermatitis, eczema and psoriasis. The LED light stimulates deep skin cells and boosts your immune function. It helps improve the healing time of wounds and compromised skin.

It's a great stand-alone treatment and an amazing addition to pretty much any other treatment.

WHAT CONDITIONS CAN BE TREATED WITH THE HEALITE II?

HEALITE II can be used as a standalone therapy or as an adjunctive therapy to a wide variety of treatments, including aesthetic laser and IPL treatments, skin needling, deep peels and pre and post skin surgery.

Each wavelength targets various different indications. Patients of all ages and skin types can benefit from the pain free, a thermal and easy to apply HEALITE treatments.

Light Emitting Diode (LED) phototherapy is the technology behind the HEALITE II system. Treatments use low level light therapy to rejuvenate the skin safely and effectively by activating the cellular recovery process.

All this is done without damaging the surrounding tissue or the need for downtime. Active acne and superficial skin lesions are just some of the concerns that can be addressed with HEALITE II. General skin rejuvenation is the main reason why this treatment is undertaken and combined with cosmetic injections.

HEALITE II WAVELENGTHS EXPLAINED

During your HEALITE session, one of three, or a combination of wavelengths is used to achieve the desired outcome.

HEALITE 2 Light Therapy – 3 lights

Here are the benefits of the different light colors and wavelengths:

- 830nm wavelength (yellow light)
Wound healing Pain relief Skin rejuvenation Scar treatment
- 633nm wavelength (red light)
Skin rejuvenation Active acne Skin cancers (as part of PDT)
- 415nm wavelength (blue light)
Treatment of active acne

The Lutronic HEALITE II is revered as one of the most advanced LED light therapy systems on the market. It's been proven to produce brilliant results over the course of several sessions. While most other systems of this nature only use two different lights to address skin concerns, HEALITE uses three.

ARE THERE ARE ANY AFTER EFFECT RISKS?

The lack of side effects is another one of the reasons why this treatment is so popular. It's designed to heal and make your skin feel its best. Almost everyone can have this treatment without the need for downtime. HEALITE LED Light Therapy helps to reduce redness and inflammation to accelerate healing.

You will definitely see improvements in the appearance and quality of your skin following LED Light Therapy.

When combined with other cosmetic treatments, HEALITE is capable of enhancing your results. This is due to the healing that takes place during a session.

WHEN CAN I EXPECT RESULTS?

If you are consistent with your treatments, you can see results in as little as two to four weeks. After each session, the wavelengths continue working for up to 12 weeks, ensuring you see gradual and ongoing results. Most patients see a noticeable difference after just one session, however depending on your desired result the Doctors and Nurses at Kapurn Skin may recommend several treatments.

WHAT CAN I EXPECT THE SESSION TO FEEL LIKE?

Any time you sit underneath the HEALITE II lights, you can expect to feel relaxed. The lights emit a warm and comfortable sensation that's very similar to sitting in soft sunlight. It does get bright though, so goggles are required during treatment.

In fact, many clients love squeezing in a power nap while under the Lutronic HEALITE. The average session doesn't last longer than 30 minutes, so you can easily fit in a treatment over lunch.

The HEALITE II LED treatment uses low level light therapy to promote skin healing and rejuvenation.

It has a wide range of treatment options and can be used to treat active acne, superficial skin lesions, promote skin rejuvenation and to heal the skin following trauma or after other cosmetic procedures.

Suitable for all skin types, post procedure recovery, collagen stimulation, rejuvenation and acne.

WHAT DOES THE TREATMENT FEEL LIKE?

The treatments are very comfortable. You will feel a warm energy coming from the HEALITE II LED panels above you, and it is very easy to relax under the light.

HOW LONG ARE THE TREATMENTS?

Depending on the program most suitable for your skin, treatments can last anywhere from 13mins-34mins. You can choose to have HEALITE II LED Light Therapy as a standalone treatment, or as a complimentary treatment after another treatment such as a medi-facial or clinical peel.

IS THERE ANY DOWNTIME AFTER THE TREATMENT?

No. Your skin may feel slightly flushed and warm for 15-30mins after your treatment, but you can go about your normally daily activities without worrying about downtime. In fact, HEALITE II LED Light Therapy can greatly reduce the downtime of other treatments such as peels, laser/IPL, skin needling and radio frequency.

HOW OFTEN CAN I HAVE HEALITE II LED TREATMENTS?

You can have treatments every 2-3 days. Results can be seen after just 1 treatment, and results will improve with each additional session thereafter. For best results we recommend having a course of 10 HEALITE II LED Light Therapy treatments, over the space of a few weeks.

HOW DOES HEALITE II LED COMPARE TO OTHER LED MACHINES?

There are many different types of LED machines that are used in skin clinics. HEALITE II was created by Dr Glen Calderhead, who is recognized as the pioneer in LED technology for skincare. HEALITE II utilizes second generation technology including photo-sequencing & Optic Lens Array technologies. These additions mean the results we can help you achieve with your skin & HEALITE II are more significant than with any other LED machine.

HEALITE II™ LED Light Phototherapy
Scientifically proven, therapeutic and non-invasive use of incident light to photo-modulate cellular function.

SPECIALIST PERSPECTIVE ON HEALITE II

“HEALITE II is an incredibly useful adjunct to almost any aesthetic or surgical treatment. It is a very safe and effective treatment modality that can be used as a standalone treatment or combined with a variety of cosmetic procedures.”

First you are probably thinking, what is HEALITE II LED Light Therapy treatment? Well, it is a pleasant, relaxing skin treatment that uses light emitting diodes (LEDs) to deliver precise wavelengths of light for the treatment of acne, superficial skin lesions, relieving pain and promoting skin rejuvenation.

1. Promotes Skin Rejuvenation

Every year we lose 1% of collagen with the inevitable ageing process. With HEALITE II LED Light Therapy we can wind back the clock and regain the much-desired glow. HEALITE II LED Light Therapy has been scientifically proven to improve collagen and elastin by stimulating deeper skin cell layers.

2. Enhances Your Body's Natural Cellular Recovery

HEALITE II LED Light Therapy enhances your body's natural cellular recovery. But you are probably thinking what does this actually mean? It improves body's healing time, it aids in pain relief, treats active acne, improves blood flow circulation and promotes skin rejuvenation.

3. Helps Treat Various Skin Conditions & Boosts Immune Function

HEALITE II LED Light Therapy not only helps rejuvenate your skin, but it has a lot of healing benefits as well. It can be used to help improve inflammatory skin conditions such as dermatitis, eczema and psoriasis. The LED light stimulates deep skin cells and boosts your immune function. It helps improve the healing time of wounds and compromised skin. It's a great stand-alone treatment and an amazing addition to pretty much any other treatment.

4. Helps Improve Acne and Breakouts

When it comes to acne, HEALITE II LED Light Therapy is a great non-invasive procedure. HEALITE II LED Light Therapy helps with the rejuvenation of your skin, which helps enhance your skin tone and texture. It has been shown to reduce the appearance of scars, reduce redness and reduces further breakouts. HEALITE II LED Light Therapy treatment improves collagen within your skin, improves your bodies healing time and kills the acne causing bacteria found in our skin.

5. No Downtime

It's clear that HEALITE II LED Light Therapy has so many benefits, but the biggest bonus? It's completely pain-free and there is no downtime. Most people describe it as a relaxing treatment – similar sensation to laying under the warm sun. If that wasn't all, immediately after the treatment, skin will appear plumper, more rejuvenated and will be glowing.
